Isolator Technology Workshop

Engineering – Validation - Operation

12-13 November 2024 | Basel, Switzerland

Highlights

- Regulatory Requirements and Trends
- New Annex 1 Requirements
- From the Conceptual Design to the Validated Equipment
- Mock-Up Study
- Process Development of Isolator Decontamination
- Bioindicators
- Troubleshooting in Isolator Technology
- Glove Integrity Testing
- Sterility Testing in Isolators
- Aseptic / Toxic Isolators
- Isolators Used in Aseptic Fill Finish Manufacturing
- Management of Indirect Products Contact Parts in an Isolator

Participate in all four workshops
at SKAN AG

Objectives

Why should you attend this event?

- You get an update on **isolators for aseptic manufacture and for sterility testing**
- You get to know the results of recent studies on the validation of isolators
- You have the opportunity to discuss your individual questions personally with experts
- You can translate the theory directly into practice during 4 workshops at the manufacturing site of Skan in Allschwil

Each participant takes part in all 4 workshops. The workshops are held at the plant of SKAN AG, partly including operational isolators. This brings the participants as close to daily practice as possible.

Background

The use of isolators is increasing both in sterility testing and in the production of sterile medicinal products, particularly in aseptic manufacture. It ensures a greater microbiological safety of the products, but at the same time requires increased inputs as regards the qualification of these systems and the validation of the production processes. In 2004, Appendix 1 to the FDA Guidance for Industry "Sterile Drug Products Produced by Aseptic Processing" defined new regulatory requirements on using this technology, as did the PIC/S document PI 014-3 "Isolators used for Aseptic Processing and Sterility Testing". The new EU GMP Annex 1 from 2022 also deals with isolators in great detail.

Target Audience

This GMP Education Course addresses those employees from the pharmaceutical industry and from suppliers **for aseptic (toxic) manufacture and for sterility testing** involved in the engineering, validation and operation of these systems, especially from the areas

- Engineering / Production
- Quality Assurance
- Qualification/ Validation
- Microbiology

The number of participants is limited.

Please understand that, for competitive reasons, not all companies can register their employees for this event.

Programme

Regulatory Requirements for Isolators for Aseptic Use

- Regulatory bodies
- US laws and regulations
- European laws and regulations
- Guidelines
- Basic Isolator definitions

Image: Skan AG

Isolator Application / Projects: From the Conceptual Design to the Validated Equipment incl. Mock-Up Study

- Key decisions
- What do we need from our customers?
- From URS to engineering – technical details and solutions
- Process challenges and features
- FAT – Installation – Qualification
- Purpose of mock-up
- What is required before starting a mock-up
- How to document a mock-up
- What simulations need to be included in the mock-up
- Execution of the mock-up itself
- Examples for our mock-up to underline the points above

Isolators in Aseptic Manufacturing

- Basics of isolator technology
 - including material transfer systems
- Qualification concept
- VHP cycle development
- Qualification of isolator combined with e-beam: VHP cycle; dosimetry; smoke study

Case Study on Management of Indirect Product Contact Parts in an Isolator

- Definition of indirect product contact part
- Regulation's requirement
- Example of implementation along the all lifecycle of indirect product contact parts

Bioindicators / Process Development of Isolator Decontamination

- Overview of current regulations and standards
- Basis and selection of suitable biological indicators as sensor for the inactivation effect
- Development and quantification of decontamination cycles
- Influence of H₂O₂ to routine processes

Troubleshooting in Isolator Technology

- The place of the isolator in a pharmaceutical process
- The influence of critical parameters on the decontamination process
- The reliability and reproducibility of biological indicators
- The expectations of regulators

Initial Validation by Media Fill of a Syringe Isolator Filling Line

- General Media Fill Design
- Line-specific Media Fill Design
- Media Fill Failure with Root Cause
- Inspection Feedback to Media Fill Design

Isolators Used for Sterility Testing

- Requirements for the isolator
 - Background of the isolator
 - Performance Qualification
 - Qualification of operators
 - Test for gas-tightness of primary packaging materials
- Handling in isolator
 - Capacity
 - Testing the tightness of gloves
- Microbiological Monitoring
 - Sample plan
 - Contamination level; contamination source
 - OOS/CAPA (example)

Workshop Session

Workshop 1

Validation Planning for an Aseptic Isolator

- Test master plan (IQ/OQ)
- IQ / OQ test protocols
- Operational qualification - procedures
- Handling of deviations

Performance of Selected Qualification Tests

- Basic SOP for testing
- Execution of tests
- Generate test records
- Drawing up the test report
- Glove testing

Glove Integrity Testing

- Regulatory Background
- Physical methods for glove integrity tests and their boundaries
- Microbiological contamination risk
- Routine program for glove integrity testing

Workshop 2

Development and Validation of H2O2 Decontamination Cycles

- Establish the requirements of a decontamination cycle
- Design a qualification strategy
- Work out the necessary physical and microbiological tests and their chronology
- Interpretation of test results and reaction on deviations
- Write a transparent qualification report
- Workshop including a real isolator system

Image: Skan AG

Workshop 3

Isolators according EU Annex 1

- Handling in isolators
- Personnel at isolators
- RTP system
- Environmental monitoring in isolators
- Frequency of decontaminations
- Problems in isolators from the point of view of a user

Workshop 4

Plant Tour

- Design of an isolator
- Construction details
- E-Beam

You will take part in all workshops!

The workshops will take place at SKAN AG in Allschwil. After the workshops, at appr. 16.05 h, a bus shuttle service will bring the participants to the airport (appr. 16.25 h), the Swiss train station (appr. 16.55 h), the German train station (appr. 17.10 h), or to the hotel.

Speakers

Christian Doriath, SKAN AG, Basel, Switzerland

Christian Doriath joined SKAN in 2012 after more than 20 years spent on isolator technology in the pharmaceutical industry at various positions, maintenance, validation, research, technical services. Since October 2018 he is Head of Process Validation Microbiology at SKAN.

Andreas Kerschbaumer, Novartis AG, Langkampfen / Schafftenau, Austria

Andreas studied Technical Chemistry and Innovation Management and has held various positions in the pharmaceutical industry since 1995. He joined Novartis in 2014 as Production Manager to build up a green field aseptic manufacturing plant. In 2021, he joined MS&T and is technically responsible for CMOs, who are producing on behalf of Novartis.

Theresa Ladwig, SKAN AG, Basel, Switzerland

2007 Theresa Ladwig joined SKAN AG as a Project Engineer in the department Cycle Development and performed Cycle Development and Microbiological Qualifications all over the world. From 2013 to 2018 she was Head of Process Validation Microbiology. Today she supports the Sales Team for Europe of Skan AG.

Ruben Rizzo, SKAN AG, Basel, Switzerland

Ruben Rizzo studied chemistry and pharma technology. He worked for Novartis Pharma (Stein) as a Production Expert in the R&D before he joined SKAN AG in 2014 as Sales Manager in the Process Solution for Isolator Technology. He is responsible for the area of Switzerland, Spain, Italy and Portugal.

Katharina Schlereth, Labor LS AG, Germany

Katharina studied Biology at the University Würzburg. 2009 she joined Labor L+S AG in Bad Bocklet, Germany, where she is responsible for sterility testing. Her current position is Division Head, Microbiological Testing of Sterile Products.

Yves Scholler, SKAN AG, Basel, Switzerland

Yves Scholler studied mechatronics at the Trinationale Engineering School (FTI) in Muttensz (CH), Mulhouse (F) and Lörrach(D). He joined SKAN AG in 2007 and is now Head of Sales Europe in the Process Solution for Isolator Technology.

Alexandra Stärk, Novartis Pharma Stein, Switzerland

Alexandra Stärk has worked since 1995 at Novartis Pharma Stein AG and was heading the microbiological QA/QC department till October 2016. In October 2016 she moved into a new role within Novartis Pharma Stein AG and is now responsible for a team of microbiological experts in the department of Manufacturing, Science & Technology.

Antoine Toussaint, GSK Vaccines, Wavre, Belgium

Master degree in Bioengineering in Chemistry & Microbiology. 12 years of experience in GSK vaccines in several roles: Manager in QC department in Environmental monitoring / Sterility Assurance Manager for primary and secondary operations / Global Sterility Assurance Lead on Technology Barrier, Facility Design, HVAC & Disinfectant.

Date of the Event

Tuesday, 12 November 2024, 09.00 h – 18.00 h

(Registration and coffee 08.30 h – 09.00 h)

Wednesday, 13 November 2024, 08.00 h – 16.05 h

After the workshops on 13 November 2024 at appr. 16.05 h, a bus shuttle service will bring the participants to the airport, the train stations or the hotel.

Venue

Pullman Basel Europe

Clarastrasse 43

4058 Basel, Switzerland

Phone +41(0)61 6908 080

Fax +41(0)61 6908 880

Fees (per delegate, plus VAT)

ECA Members € 1,890

APIC Members € 1,990

Non-ECA Members € 2,090

EU GMP Inspectorates € 1,045

The conference fee is payable in advance after receipt of invoice and includes conference documentation, dinner on the first day, lunch on both days and all refreshments. VAT is reclaimable.

Accommodation

CONCEPT HEIDELBERG has reserved a limited number of rooms in the conference hotel. You will receive a room reservation form/POG when you have registered for the course. Reservation should be made directly with the hotel. Early reservation is recommended.

Registration

Via the attached reservation form, by e-mail or by fax – or search and register directly at www.gmp-compliance.org under the number 20870.

Presentations/Certificate

The presentations for this event will be available for you to download and print before and after the event. Please note that no printed materials will be handed out on site and that there will not be any opportunity to print the presentations on site. After the event, you will automatically receive your certificate of participation.

Conference language

The official conference language will be English.

Organisation and Contact

ECA has entrusted Concept Heidelberg with the organisation of this event.

CONCEPT HEIDELBERG

P.O.Box 10 17 64

69007 Heidelberg, Germany

Phone +49(0)62 21/84 44-0

Fax +49(0)62 21/84 44 34

For questions regarding content please contact:

Dr Andreas Mangel (Operations Director) at

+49(0)62 21/84 44 41, or per e-mail at

mangel@concept-heidelberg.de

For questions regarding reservation, hotel, organisation

etc. please contact:

Mr Rouwen Schopka (Organisation Manager) at

+49(0)62 21/84 44 13, or at schopka@concept-heidelberg.de

Social Event

On 12 November you are cordially invited to a social event. This is an excellent opportunity to share your experiences with colleagues from other companies and the speakers in a relaxed atmosphere.

Your Benefits

Internationally Acknowledged Certificate from ECA Academy

The EU GMP Guide requires: „... All personnel should be aware of the principles of Good Manufacturing Practice that affect them and receive initial and continuing training...“. This is why you receive an acknowledged participant certificate, which lists the contents of the seminar in detail and with which you document your training.

This Training Course is recognized for the GMP/GDP Certification Scheme

Building on your education the ECA GMP/GDP certification programmes provide you with the appropriate supplement to acquire this qualification. This Live Online Training is the first element for your additional certification. Simply choose any three courses within the programme according to your professional interest. Your certificate is then valid for two years. To renew it, you can pick any training from the ECA courses and conferences list within that two-years period – allowing you to broaden your knowledge in GMP and GDP compliance. Please find more information at www.gmp-certification.org

This could be of interest for you as well

Would you like to train a larger group of participants in your company?

We offer practice-oriented GMP/GDP training courses on:

- Basic GMP
 - Biopharmaceuticals
 - Quality Assurance
 - Validation/Qualification
 - Sterile Manufacturing
 - Data Integrity
 - Technical Operations
- and more...

You will find a time schedule for each training course at <https://www.gmp-compliance.org/training/gmp-gdp-in-house-trainings>.
